

Vivi Receiver Release 2.2.2 (Optional)

What's changed?

- Significantly reduced buffering times between chapters when playing videos through ClickView using Video Direct.
- The resolution of ClickView videos now matches the set stream resolution in the Vivi App.
- Fixed issue with corrupt screenshots caused by certain formats of ClickView videos.
- Fixed issue with subtitles on ClickView videos enabling between chapters.
- Fixed issue with ClickView videos of a specific format not playing on Vivi if the video had already started playing in the browser.
- Fixed issue causing ClickView and Vivi to lose sync.
- Support for ClickView New Zealand.

Who does this affect?

Customers with ClickView subscriptions.

Who should update to this release?

Customers who use the Video Direct feature to play ClickView videos.
