

3.2. Screen Sharing

Clicking Present My Screen will share the screen of your device on the Vivi-connected display. From here you can Pause the Screen and Control the Volume of the Vivi.

Pause Screen lets you freeze the screen you are currently on. To do so, press the pause icon that appears when you start sharing. To resume, press the play icon.

Note

On mobile devices you have a 10 second countdown to navigate to the screen you want to pause on.

Volume Controls are there to help you turn up or turn down the volume the Vivi is outputting as well as mute it completely.

iOS / Mac Users

These on-screen instructions will display automatically if you are using an Apple device (iPad, iPhone, MacBook, iMac) and have pressed the Present My Screen button.
